

**Joan Garcia** obtained a PhD in Biology in the University of Barcelona for his thesis dissertation on wastewater treatment systems with microalgae. He was appointed at the Universitat Politècnica de Catalunya as Professor of Environmental Engineering in 2008. His main research interests right now are bioproducts from wastewaters, natural wastewater systems such as constructed wetlands and environmental evaluation of technologies. Over he's career he has published more than 200 scientific articles on water and environmental biotechnologies. He has been Research visitor in the University of California (2001), University of Gent (2005) and Florida Gulf Coast University (2018). He is the Editor-in-Chief of the Nature Based Solutions Journal.
